## Zerto Wins Best of VMworld Europe Award

Zerto Customer Liverpool Heart and Chest Hospital Recognised for "Best Virtualisation for Disaster Recovery" at the VMworld Europe 2014 User Awards

## Zerto Brings Enterprise-Class Replication to Microsoft Hyper-V

## VM Replication to Amazon Web Services

Zerto Virtual Replication for AWS previews at re:Invent November 11-14

## Zerto Virtual Replication 3.5 is Here

Virtual Replication, Recovery & Offsite Backup

## From Our Customers

**UL Physicians**

"We tried two other top-tier replication solutions, but neither provided the performance that we require. ZVR was a perfect fit."

Robert Patterson  
UofL Physicians

**JR/  
GROUP**  
JAMES RICHARDSON

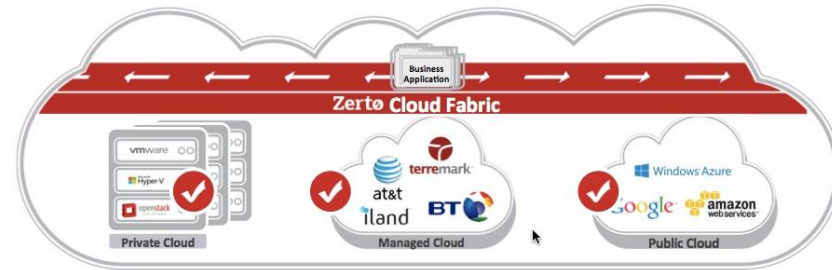

"Installation was fast, we were protecting in 2 hours and measured RTO of an impressive 5 minutes."

Anup Mohan  
James Richardson

**FORESIGHT**

"We got a BC/DR solution that is easy to use and install, did not require a duplicate SAN environment and was within our budget."

Andrew LaPour  
Foresight Financial

- Any Network
- No Downtime
- Multi-tier Apps
- Multi-TB Data
- Automation
- Simple Orchestration
- Protection

## What is Zerto?

Zerto provides enterprise-class business continuity and disaster recovery (BCDR) solutions for virtualized infrastructure and cloud. Zerto won Best of Show at VMworld 2011, as well as 2011 Product of the Year Gold Award because our software, Zerto Virtual Replication, is the industry's first hypervisor-based replication solution for tier-one applications. Zerto Disaster Recovery solutions replace traditional array-based BCDR that was not built to deal with virtual environments.

## What's New at Zerto

### What is Hypervisor-based Replication?

A simpler approach to DR! Compare hypervisor-based replication to guest/OS-based and array-based replication. Read about Zerto's easy integration with VMWare.

### Case Study: Fortune 100 Company Moves Away from Array

Prior to Zerto, this well known Fortune 100 Company leveraged an array-based Disaster Recovery process with very high RTOs. Read how Zerto helped achieve RTOs of minutes and RPOs of seconds, and to fast track an application migration.

**ING**

"ZVR has everything we need to effectively protect our production workloads: simple DR testing and application consistent recovery."

Brian Mitchell  
Senior Server Engineer

Simply the  
**SMARTEST  
 WIRELESS**  
 for a **MOBILE WORLD**

Smart Wi-Fi indoor and outdoor voice, video and data innovations—across the worldwide 802.11 spectrum.

How our WBA solution delivers Wi-Fi range and possibilities for operators

### SmartCell Gateway

The first in a new category of versatile and scalable service platforms capable of supporting hundreds of thousands APs.

### SmartCell Access Points

Easily deploy Wi-Fi and integrated 3G/4G/LTE smallcells with SmartCell Access Points.

### ZoneFlex Indoor

Highest performance Smart Wi-Fi indoor access point with dynamic beamforming.

### EdgeSafe Mailbox Backup - Enterprise Backup Solution

NEW - Organizations that use Microsoft Exchange can consistently and reliably backup the Exchange mailboxes using EdgeSafe Mailbox/OST Backup. The Backup can be done for mailboxes that are local, hosted elsewhere, and it can even backup Office 365 mailboxes as well as Exchange mailbox backup. EdgeSafe Mailbox... [Read more](#)

- ✓ **Mailbox Backup**..... Backs up Exchange mailbox data
- ✓ **Flexible**..... Backs up cloud or in-house based Exchange Mailboxes
- ✓ **Stable**..... Uses the OST cache file as the source
- ✓ **Offline/Online backup**..... Exchange could be offline during backup
- ✓ **Easy to integrate**..... Backup does not need more permission than Outlook has
- ✓ **Standard Backup file**..... Uses native Outlook format
- ✓ **Fast**..... Uses incremental backup algorithm
- ✓ **Manageable**..... Has a central control station
- ✓ **History**..... Preserves historically backed up items
- ✓ **New**..... Office 365 mailbox backup

### EdgeSafe PST2PST Backup - Enterprise PST backup solution

EdgeSafe PST2PST Backup is the leading PST backup solution for organizations that swiftly and incrementally backs up PST files even if Microsoft® Outlook® is open. Featuring simple native PST recovery, and central management for the PST file backup / Outlook Backup process...

- ✓ **Automatic**..... Transparent to end user
- ✓ **Fast**..... Uses incremental backup technology
- ✓ **Standard**..... Uses native Outlook file for backup
- ✓ **Simple Management**..... Central management and reports
- ✓ **Disaster Recovery**..... Simple recovery of the entire PST
- ✓ **History Retention**..... Preserves historically backup up items
- ✓ **Price**..... Starts at \$294.69 for a 5 license solution

### EdgeSafe File Backup - Enterprise Laptop Desktop Workstation Backup

EdgeSafe File Backup provides an advanced, yet simply to implement, backup solution for laptops and desktops in organizations. EdgeSafe File Backup solution, can swiftly backup files and folders incrementally, while maintaining historical backup versions without multiplying the required backup space, and at the same t...

- ✓ **File Backup**..... Allows backup of files/folders from laptops and desktops
- ✓ **Automatic**..... Does not need user intervention
- ✓ **Central Control**..... Allows to centrally control user/group configurations
- ✓ **Reporting**..... Central and detailed reporting to administrator
- ✓ **Scalable**..... Supports few to tens of thousands user
- ✓ **Backup History**..... Retains older backup versions without multiplying backup space
- ✓ **Light**..... Incremental backup reduces backup size, transfer time, and network traffic

### EdgeSafe File Backup Agent - Enterprise Workstation Backup Agent

EdgeSafe File Backup Agent complements EdgeSafe Backup solution to provide the most advanced backup solution for laptops and desktops in organizations. With this agent, EdgeSafe Backup solution, can backup files and folders incrementally, and maintain historical backup versions without multiplying the backup space...

- ✓ **File Backup**..... Allows backup of files/folders from workstations
- ✓ **Automatic**..... Does not need user intervention
- ✓ **Central Control**..... Allows to centrally control user/group configurations
- ✓ **Reporting**..... Central and detailed reporting to administrator
- ✓ **Scalable**..... Supports few to tens of thousands users
- ✓ **Backup History**..... Enables recovery of older backed up versions months after they could have been deleted
- ✓ **Low Overhead**..... Incremental backup reduces backup size, transfer time, and network traffic

### EdgeSafe PST2PST Migrator™

#### Enterprise Outlook PST Migration Solution for Google Apps

EdgeSafe PST2PST Migrator solves the Gmail / Google Apps Migration challenge for Outlook PST files. Recently announced support for GAMME 2.0 (Google Apps Migration for Microsoft® Exchange®), delivers an enterprise solution for migrating PST files into Gmail and Google Apps and features the following:

- Automatic PSTs aggregation for GAMME
- Support for phased migration to Gmail/Google Apps
- Enterprise solution with central control station

EdgeSafe PST2PST Migrator solves the challenge of locating, aggregating and loading Outlook PST files into the cloud for use with Gmail and Google Apps. It delivers a unique migration of PST files located on workstations onto a central storage location for uploading to Google Apps Using GAMME.

EdgeSafe PST2PST Migrator uses incremental PST synchronization technology, which continuously updates the aggregated PST files during a phased migration, and copies only items that have been created or modified since the last synchronization run. This makes it fast, efficient and light on the network.

It can also migrate PST files even if Outlook is running, which ensures automatic migration and avoids the the user having to close Outlook and wait for the migration to finish.

Pricing details -- Starts at \$299 for five agent licenses, which includes a permanent license for the Control Station software plus one year of software maintenance and remote support.

### RRB - Relative Rev Backup

RRB (Relative Rev Backup) is a disk backup software for files and folders that reside on servers (Windows 2000, 2003) or standalone workstations (Windows 2000/XP). The software also manages a space efficient backup library on the backup disk.

RRB can recover files/folders that have been unnoticeably deleted or corrupted a few days back as well as recover them from versions that are weeks, months and even YEARS old.

Unlike other solutions that need to multiply the backup space - RRB requires a backup space that is a function of the existing files and their history. For more info contact [sales](#).

- EdgeSafe File Backup
- EdgeSafe File Backup Agent

#### Testimonials

My company has been worried about our POP email implementation, and with DataMills' EdgeSafe PST application, this is no longer a concern. The product is fast and extremely reliable. The DataMills Support Group worked quickly and efficiently to get the solution up and running.
